Notes for My Paper

Don't forget to include examples of topicalization. They look like this:

(1) Topicalization from sentential subject: a $John_i$ [a kltukl [el l-oltoir er $ngii_i$ a Mary]] \mathbf{R} -clear COMP \mathbf{IR} .3s-love P him John, (it's) clear that Mary loves (him).

How to handle topicalization

I'll just assume a tree structure like (2).

(2) Structure of A' Projections:

$$\begin{array}{ccc} & & & & \\ \text{Spec} & & & \text{C}' & \\ & & & & \\ & & & \text{C} & & \text{SAgrP} \end{array}$$

Mood

Mood changes when there is a topic, as well as when there is WH-movement. *Irrealis* is the mood when there is a non-subject topic or WH-phrase in Comp. *Realis* is the mood when there is a subject topic or WH-phrase.
